Chicago B reference types for EndNote

Last updated FEBRUARY 2023

This brief guide outlines which reference types to select and which fields to populate in EndNote when using the Chicago 17th B Curtin EndNote style.

Always check your EndNote reference outputs against the [Chicago 17th B referencing guide](#) for accuracy.

Important information for all reference types

When entering a reference into EndNote you only need to include the basic data. Unless stated otherwise in this guide, do not include punctuation or formatting such as colons, full stops, brackets, and italics, or text such as In, Retrieved from, ed., Ed. in the reference. The Chicago 17th B Curtin style will include this automatically when formatting the reference.

Populating the author field

When entering **personal authors** or editors into EndNote use the format **Last Name, First Name**

Example: Shakespeare, William

When entering an **organisation** as the author, **include a comma** at the end of the organisation's name so EndNote displays the complete name in the reference

Example: Department of Health,

You must use the **correct capitalisation** for author details. EndNote will display the author's information with the exact capitalisation that you have used

Example: Smith, Jane A.

Title capitalisation

Chicago uses headline style capitalisation, where all significant words in the title start with a capital letter (e.g. Philosophy and Poetry: **A New Look** at an **Old Quarrel**). Stop words such as: a, is, it, at, on, etc. are not capitalised.

When two or more capitalised letters appear in a title (e.g. ANZ, USA), EndNote will incorrectly display the information as Anz or Usa. To ensure abbreviations and acronyms display correctly:

1. Select **Edit** (Windows) or **EndNote** (Mac) and click on **Preferences**
2. Select the **Change Case** option
3. Enter the abbreviation/ acronym etc. with the correct capitalisation, click **Apply** and **OK**.

Manual changes to references

Chicago is a complex style and in some instances EndNote may not be able to accommodate all the elements or formatting required for a particular reference type. If manual changes are required, you will need to make these once you have finished creating your reference list in Word and [converted your document to plain text](#). To convert to plain text:

1. In the CWYW toolbar click **Convert Citations and Bibliography** (Windows) or **Tools** (MAC) and select **Convert to Plain Text**
2. A new unsaved document with no field codes (not linked to EndNote) will be created
3. Save it with a new file name (your original document with the field codes will be unchanged and still be linked to EndNote)
4. Manually edit the references in the plain text copy of the document.
